Summary of Record of Interview Requirements

Manual of Patent Examining Procedure (MPEP), Section 713.04, Substance of Interview Must be Made of Record

A complete written statement as to the substance of any face-to-face, video conference, or telephone interview with regard to an application must be made of record in the application whether or not an agreement with the examiner was reached at the interview.

Title 37 Code of Federal Regulations (CFR) § 1.133 Interviews

Paragraph (b)

In every instance where reconsideration is requested in view of an interview with an examiner, a complete written statement of the reasons presented at the interview as warranting favorable action must be filed by the applicant. An interview does not remove the necessity for reply to Office action as specified in §§ 1.111, 1.135. (35 U.S.C. 132)

37 CFR §1.2 Business to be transacted in writing.

All business with the Patent or Trademark Office should be transacted in writing. The personal attendance of applicants or their attorneys or agents at the Patent and Trademark Office is unnecessary. The action of the Patent and Trademark Office will be based exclusively on the written record in the Office. No attention will be paid to any alleged oral promise, stipulation, or understanding in relation to which there is disagreement or doubt.

The action of the Patent and Trademark Office cannot be based exclusively on the written record in the Office if that record is itself incomplete through the failure to record the substance of interviews.

It is the responsibility of the applicant or the attorney or agent to make the substance of an interview of record in the application file, unless the examiner indicates he or she will do so. It is the examiner's responsibility to see that such a record is made and to correct material inaccuracies which bear directly on the question of patentability.

Examiners must complete an Interview Summary Form for each interview held where a matter of substance has been discussed during the interview by checking the appropriate boxes and filling in the blanks. Discussions regarding only procedural matters, directed solely to restriction requirements for which interview recordation is otherwise provided for in Section 812.01 of the Manual of Patent Examining Procedure, or pointing out typographical errors or unreadable script in Office actions or the like, are excluded from the interview recordation procedures below. Where the substance of an interview is completely recorded in an Examiners Amendment, no separate Interview Summary Record is required.

The Interview Summary Form shall be given an appropriate Paper No., placed in the right hand portion of the file, and listed on the "Contents" section of the file wrapper. In a personal interview, a duplicate of the Form is given to the applicant (or attorney or agent) at the conclusion of the interview. In the case of a telephone or video-conference interview, the copy is mailed to the applicant's correspondence address either with or prior to the next official communication. If additional correspondence from the examiner is not likely before an allowance or if other circumstances dictate, the Form should be mailed promptly after the interview rather than with the next official communication.

The Form provides for recordation of the following information:

- Application Number (Series Code and Serial Number)
- Name of applicant
- Name of examiner
- Date of interview
- Type of interview (telephonic, video-conference, or personal)
- Name of participant(s) (applicant, attorney or agent, examiner, other PTO personnel, etc.)
- An indication whether or not an exhibit was shown or a demonstration conducted
- An identification of the specific prior art discussed
- An indication whether an agreement was reached and if so, a description of the general nature of the agreement (may be by attachment of a copy of amendments or claims agreed as being allowable). Note: Agreement as to allowability is tentative and does not restrict further action by the examiner to the contrary.
- The signature of the examiner who conducted the interview (if Form is not an attachment to a signed Office action)

It is desirable that the examiner orally remind the applicant of his or her obligation to record the substance of the interview of each case. It should be noted, however, that the Interview Summary Form will not normally be considered a complete and proper recordation of the interview unless it includes, or is supplemented by the applicant or the examiner to include, all of the applicable items required below concerning the substance of the interview.

A complete and proper recordation of the substance of any interview should include at least the following applicable items:

- 1) A brief description of the nature of any exhibit shown or any demonstration conducted,
- 2) an identification of the claims discussed,
- 3) an identification of the specific prior art discussed,
- 4) an identification of the principal proposed amendments of a substantive nature discussed, unless these are already described on the Interview Summary Form completed by the Examiner,
- 5) a brief identification of the general thrust of the principal arguments presented to the examiner,

(The identification of arguments need not be lengthy or elaborate. A verbatim or highly detailed description of the arguments is not required. The identification of the arguments is sufficient if the general nature or thrust of the principal arguments made to the examiner can be understood in the context of the application file. Of course, the applicant may desire to emphasize and fully describe those arguments which he or she feels were or might be persuasive to the examiner.)

- 6) a general indication of any other pertinent matters discussed, and
- 7) if appropriate, the general results or outcome of the interview unless already described in the Interview Summary Form completed by the examiner.

Examiners are expected to carefully review the applicant's record of the substance of an interview. If the record is not complete and accurate, the examiner will give the applicant an extendable one month time period to correct the record.

Examiner to Check for Accuracy

If the claims are allowable for other reasons of record, the examiner should send a letter setting forth the examiner's version of the statement attributed to him or her. If the record is complete and accurate, the examiner should place the indication, "Interview Record OK" on the paper recording the substance of the interview along with the date and the examiner's initials.

Art Unit: 1762

Continuation of interview summary

Discussed the 6/27/2006 amendments, particularly noting that the scope of the semiconductor layer

has been broadened from "amorphous silicon" to "non-single crystalline semiconductor", which will

require an expansion of the search, however other limitations, which narrowed the claims have also been

added. It was noted that the amended limitation for removing the insulating layer in claims 61 & 71 are

removing a layer that has not been positively deposited, hence creating a logic problem. The amendments

to independent claims 66 & 76 were noted to add new limitations to dopants, and new independent claims

140 & 141 are to particular gate insulating structures. These three sets of new limitations need to be

reviewed or considered for potential species differences for the overall general process.

Discussed means of entering amendments to parent case 07/626,419, for which a petition has

been granted to allow amendment of the specification to correct typographical errors (note attached

papers & related cases 07/288,186 & 07/097,190), however the PTO cannot find these paper files, so the

amendments have not yet been considered. The examiner knows of no way of considering/entering an

amendment to a case to which she has no access, hence advises that requesting reconstruction of the

file(s) would be appropriate.

SUBSTITUTE AMENDMENT OF ABANDONED APPLICATION SERIAL NO. 07/626,419

Mail Stop Amended Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

Sir:

Please amend the subject application as follows:

other to PDL-413 of 08/169,127 Docket No. 740756-538 Serial No. 07/626,419 Page 2

IN THE SPECIFICATION:

Please amend the first paragraph of the specification as follows:

The application is a continuation of Serial No. 288,186 filed December 22, 1988, now abandoned, which was a continuation-in-part of Serial No. 07/97,190 07/097,190 filed September 16, 1987 (now U.S. Patent No. 4,861,964)

attach to PTOL-413 of 08/169/127 Serial No. 07/626,419
Page 3

REMARKS

The subject abandoned application is presently being amended to correct a typographical error, noted above, that occurred when effecting the completion of the chain of co-pendency between application Serial No. 08/169,127 and U.S. Patent No. 4,861,964.

Specifically, amendment of the subject abandoned application was granted on Petition in a Decision dated May 13, 2005 (copy attached). In this decision, the Office of Petitions indicated on page 2 thereof that the amendment filed in the instant application miscaptioned Application No. 07/097,190 as "01/97,190." Petitioner was requested therein to file a substitute amendment correctly identifying all applications for which benefit under 35 U.S.C. 120 is being claimed. As a result, entry of this substitute amendment should be considered acceptable and entry is respectfully requested.

Respectfully submitted,

Jeffrey L. Costellia

OFFICE OF PETITIONS

In re Application of Shinohara et al Application No. 07/626,419 Filed: 14 December, 1990 Atty Docket No. 756-945

ON PETITION

This is a decision on the petition under 37 CFR 1.182, filed on 19 August, 2004 (certificate of mailing date 11 March, 2004), requesting entry of an amendment to the specification to insert a reference to an earlier-filed application pursuant to the provisions of 35 U.S.C. § 120.

The petition is **GRANTED**.

The record indicates that this application was co-pending with earlier-filed nonprovisional application No. 67/288,186, filed on 22 December, 1998, which was co-pending with earlier-filed nonprovisional application No 07/097, 190, which was filed on 16 September, 1987. Petitioner requests that this abandoned application be amended by inserting a reference to the earlierfiled application.

35 U.S.C. § 120 permits entry of a subsequent amendment to an abandoned application in applications filed prior to 29 November, 2000, to include the benefit of an earlier filing date for purposes other than prosecution.

In view thereof, the request for entry of an amendment to insert a reference to the above-noted earlier-filed applications is granted.

See Sampson v. Commissioner of Patents and Trademarks, 195 USPQ 136 (D.C.D.C.

2

Application No. 07/626,419 Application No. 07/626,419 About to PTOL-413 of 08/169,127

It is noted that the amendment filed with the present petition miscaptions Application No. 07/097,190 as "07/97,190". However, as petitioners provided the correct U.S. Patent number which issued from the above-identified application, the Office was able to determine the correct application number. Nevertheless, petitioners should file a substitute amendment correctly identifying all applications for which the benefit under 35 U.S.C. § 120 is being claimed.

The address listed on the petition is different than the correspondence address of record. A courtesy copy of this decision is being mailed to the address noted on the petition. However, until otherwise instructed, all future correspondence regarding this application will be mailed solely to the address of record.

The petition fee of \$130.00 will be charged to counsel's deposit account, No. 19-2380, as authorized in the present petition.

The application file is being forwarded to Technology Center 1700 for entry of the amendment.

Telephone inquiries concerning this matter may be directed to the undersigned at (571)272-3231.
